YOUR TWO MOST VALUABLE ASSETS ARE PEOPLE & EQUIPMENT
PROTECT BOTH WITH R.I.G.S.
Maximize Your Investment By Saving Time & Money

**Assembles in Minutes**
No special skills required.

**Accessibility**
Quick removal of all or part for maintenance and workovers; can easily be taken down and reinstalled without destroying the fence.

**Durable**
Long lasting, heavy duty panels with UV Protected Architectural Grade Powder Coat Finish provide security and maintain their appearance for years. RIGS Panels are recyclable and portable for repeated use at multiple sites.

**Aesthetics Add Value**
Attractive location sites please landowners while providing intrinsic value and a professional appearance to the asset.

**Long Term Return**
When compared to other perimeter guarding options (chain link or barbed wire) RIGS offers exceptional value in security and protection.

**PERIMETER GUARDS (SIX RAIL)**

**Features:**
- Modular & Portable
- Easily Adaptable, Reusable and Safe
- Multiple Lengths & Gauges Available
- Architectural Grade Powder Coat Finish with UV Protectors

**KENSTAKE**
A KenStake is a 10” long 1/2” rod with welded cap and connected chain used to keep your Perimeter Guard panels from shifting or being moved by animals. KenStakes also deter theft.

**WALK-THRU PANELS**
These panels include a “walk thru” gate to provide easy access to your equipment.
Our Perimeter Guards are

Versatile & Assemble
In Minutes!

With Features Like...

**Angled Barbed Wire Extensions**
Angled Barbed Wire Extension arms are used to increase the height and provide additional security for the Perimeter Guards. The arm is a U-Shaped bent metal with wire slots, welded directly onto a 3-way connector that slides into the end frames of two adjoining panels.

**Standard Barbed Wire Extensions**
Each standard extension arm is made of 1.05" OD balled pipe with 3 barbed wire loops, welded directly onto a 3-way connector that slides into the end frames of two adjoining panels.

**Standard 3-Way Connector**
Standard 3-Way Connectors are used to securely join the tops and bottoms of your Perimeter Panels together.

**PERIMETER GUARDS**
(WIRE MESH)

**Features:**
- 72" Tall Panels
- Galvanized 1-5/8" Tubing
- 8 Gauge 2”x4” Non-Climb Wire Mesh
- Modular & Portable
- Easily Adaptable, Reusable and Safe
- Multiple Lengths Available
- Architectural Grade Powder Coat Finish with UV Protectors
- Includes 3-Way Connectors, Barbed Wire Extensions are available separately

**Easy Access for Repairs**
Greater availability to work on projects without destroying the fencing.

**THE BEST PROTECTION FOR YOUR VALUABLE ASSETS**
Our durable guarding systems help protect your production units, valves and controls from damage by vandals and animals.
