Drive Line	Shielded PTO Shaft	Shielded PTO Shaft
Widths	60" (Overall 6'7")	84" (Overall 8'10")
Weight	595 lbs.	876 lbs.

PRODUCT DETAILS

- Two sizes to choose from. (5' & 7')
- Clean up hard pan problems by having dry litter all the way to the House Pad.
- Drier litter increases "livability" percentage.
- Pulverizes hard cake while lifting and aerating all of the bedding from the pad up.
- Skids designed to penetrate litter and ride on the top of the pad.
- Be able to prepare your bedding at any time in any weather. Even if you have disease problems.

- Leaves a smooth, soft, well aerated surface.
- Low Maintenance: Regular greasing and washing gives years of trouble free service.
- Save time and money while being environmentally friendly. Reusing litter reduces costs and labor involved in frequent clean outs or decaking.
- Fertilizer value is increased by being able to clean out during optimum plant growing seasons.
- Recommended 3 passes per house, 8 hours apart depending on temperature, humidity and wetness of the cake.

Free swinging, helical design of hammers (not blades or tines) lift the litter up from the floor at over 700 rpm's, breaking apart the cake.

Turn cake into loose, aerated, dry bedding. You only remove the bedding at the most opportune time, significantly improving the weight and value of litter cleanout.

Time Tested ~ Grower Approved. Our original 7' prototype was tested in over 2000 houses within a 6 month time period. More than 4 years later it is still being used.

Save Time = Money. Litter Saver is offset so that you can reach all the way to the curtain wall. No more dead spaces.

WARNING: A respirator equivalent to 3M respirator #5206 with multi-vapor filter 5N11 is required while operating the Litter Saver to minimize risk of respiratory problems. Safety Glasses equivalent to Sellstrom Safeguard Flexible Cover Goggles, Model #88010 with anti-fogging lenses are required. (Items are included with each Priefert Litter Saver purchase)

Litter conditions are very important to the performance and health of today's market poultry, making proper litter management a top priority for producers. Priefert's Litter Saver provides poultry producers an efficient and economical way to manage their litter. Not only will the Litter Saver allow you to create great litter conditions for your birds, but it will also save you money in clean out expenses and shavings costs. With this machine, you will have less money in your equipment, less time in house preparation, less maintenance, and you can clean houses in any weather condition. Priefert Litter Savers are "Time Tested – Grower Approved."

"As you well know, litter conditions are very important to the performance and health of today's broiler chickens. I have looked at every type of litter conditioning machine available to our industry and in my opinion, the Priefert Litter Saver is the most affordable machine on the market. The benefit to owning a Litter Saver is that you will always have great litter conditions for your birds and it will save you money in clean out expense and shavings cost. Bottom line is, for a small investment, you can have a machine that will continue to make you money for years."

KEN SCHUBRING JR. *Fieldale Farms Corp. | Division Mgr/Production Coordinator*

"For over 20 years as a grower for Perdue, I am convinced that the Priefert Litter Saver offers one of this industry's greatest improvements for efficiency and profitability. I invest less money in the machine, less time in preparation, less maintenance, and can do the job with no hindrance regardless of the weather. I cannot imagine returning to the old method of crust, load and dump in foggy goggles and wet clothes!"

LARRY PORTER *Little Acorn Farm | Princess Anne, MD*

"After 13 years of use on the Southern Arkansas University Poultry Farm, the Priefert Litter Saver performs to reduce litter wastage, provides a more wholesome environment for the chickens, and reduces the number of times a producer has to clean the houses because of poor litter conditions. The Litter Saver does exactly what the name implies - it saves litter for our college operations."

JIM TOLLETT, PH.D. *Retd. Chair, Professor of Agriculture | Southern Arkansas University*
