## Change THE WAY YOU trim trees.

Introducing the LimbSaw, a tree trimming attachment that mounts directly to the front end loader of your tractor, skid loader or backhoe. This commercial-grade chainsaw attaches easily to a receiver on the back of your front end loader or bucket and connects to your tractor's auxiliary hydraulics. The unit comes with an eight foot mast that can reach limbs **18 to 20 feet** when attached to an average loader. The LimbSaw attachment folds into a convenient transport position and at only 84 lbs makes it easy to remove and store in your shop or garage.

### Safe. Fast. Easy TO USE.

Using hand-held chainsaws, bow saws, or pole-saws while standing in the bucket of a tractor or ladder is simply an accident waiting to happen. The LimbSaw drastically **reduces the risk of injury** by eliminating these common practices. **Limbs fall in front of the loader** while you sit in the safety and comfort of your tractor seat. In addition, the danger of **chainsaw kickback is virtually eliminated**. And the ability to reverse the motor can provide needed help to back the saw out in case of a pinch.

Besides the obvious safety advantages, with the LimbSaw **one person can trim an entire tree in just minutes!** You have to see it to believe it. Visit us on the web at [www.limbsaw.com](http://www.limbsaw.com) to see just how much time you can save with the LimbSaw.

## No More

- LADDERS
- LIFTS or BUCKETS
- HAND SAWS
- HAND HELD CHAINSAWS
- POLE PRUNERS

## Durable & Affordable

For unsurpassed durability, the LimbSaw's extension arm is made from **heavy-duty square tubing** that is double-walled at the cutting end. While most chainsaw bars are laminated, the LimbSaw's chain bar is made from a **single piece of hardened alloy steel**, and is laser cut for precision. Kickback is not an issue with the LimbSaw because each saw is equipped with an **aggressive chain** that utilizes each and every tooth for maximum cutting power.

850 lbs of weight is no match for the Limbinator's™ solid-steel frame

If you have ever paid to have a tree trimmed by a professional, you know how costly it can be. The LimbSaw **pays for itself** in no time and will **save you thousands of dollars** in the long-run. Stop wasting money paying someone else to trim your trees. Get a LimbSaw and start saving today.

- Mounts directly to front end loader of your tractor, skid loader or backhoe and is easily attached by one person
- 5,000 RPMs means incredible cutting power
- Quieter, safer and easier to use than hand held chainsaws
- Reversible motor helps back the saw out of a pinch
- Equipped with a self-oiling system
- Easy-access, built-in chain tensioning system
- Trims limbs up to 8 feet higher than your loader can reach

## The Brief History of the LimbSaw

The loader mounted, hydraulic powered chainsaw that we sell today as the LimbSaw was invented by Wendell McCracken of Pauls Valley, Oklahoma. A retiree with a Master's Degree in Electrical Engineering, Wendell and his wife Donna raised eight children on their 250 acre pecan and cattle farm where tree trimming was an ongoing family chore.

Having invented and patented items his whole life, Wendell came up with the LimbSaw after his children moved away and left the pruning to him and his wife. Far from his first invention, Wendell has worked on radar systems for the B-58 Hustler project and has several other

patents relating to phone systems and "down hole" measuring devices. He has even worked on armored bullet proof cars and most recently built his own airplane.

## Helpful FAQ's

**Q** How long is the chainsaw bar?

**A** The bar is 20" in length

**Q** What kind of chain is used on the LimbSaw?

**A** 81 drive link, .325-inch pitch, .063-inch gauge

**Q** How does the LimbSaw hook up to my tractor's hydraulic system?

**A** The LimbSaw comes with a standard male fitting (1/2-inch pipe thread) that will easily hook into your tractor's quick-connect system.

**Q** Do I have to buy replacement parts from LimbSaw?

**A** No. The LimbSaw's bar and chain can be replaced with other brands, but doing so may result in degraded performance
