

**PARTS LIST FOR FLAG POLE**

- 1) Flag pole anchor section - 1 req.
- 2) Cleat pole section - 1 req.
- 3) Interior pole section - 2 req.
- 4) Top pole section - 1 req.
- 5) Flag Clip - 2 req.
- 6) Gold Ball Finial Assembly - 1 req.

**TOOLS REQUIRED**

- Post Hole Digger
- 3 foot level
- Channel lock Pliers (Finial Assembly)

**ASSEMBLY INSTRUCTIONS**

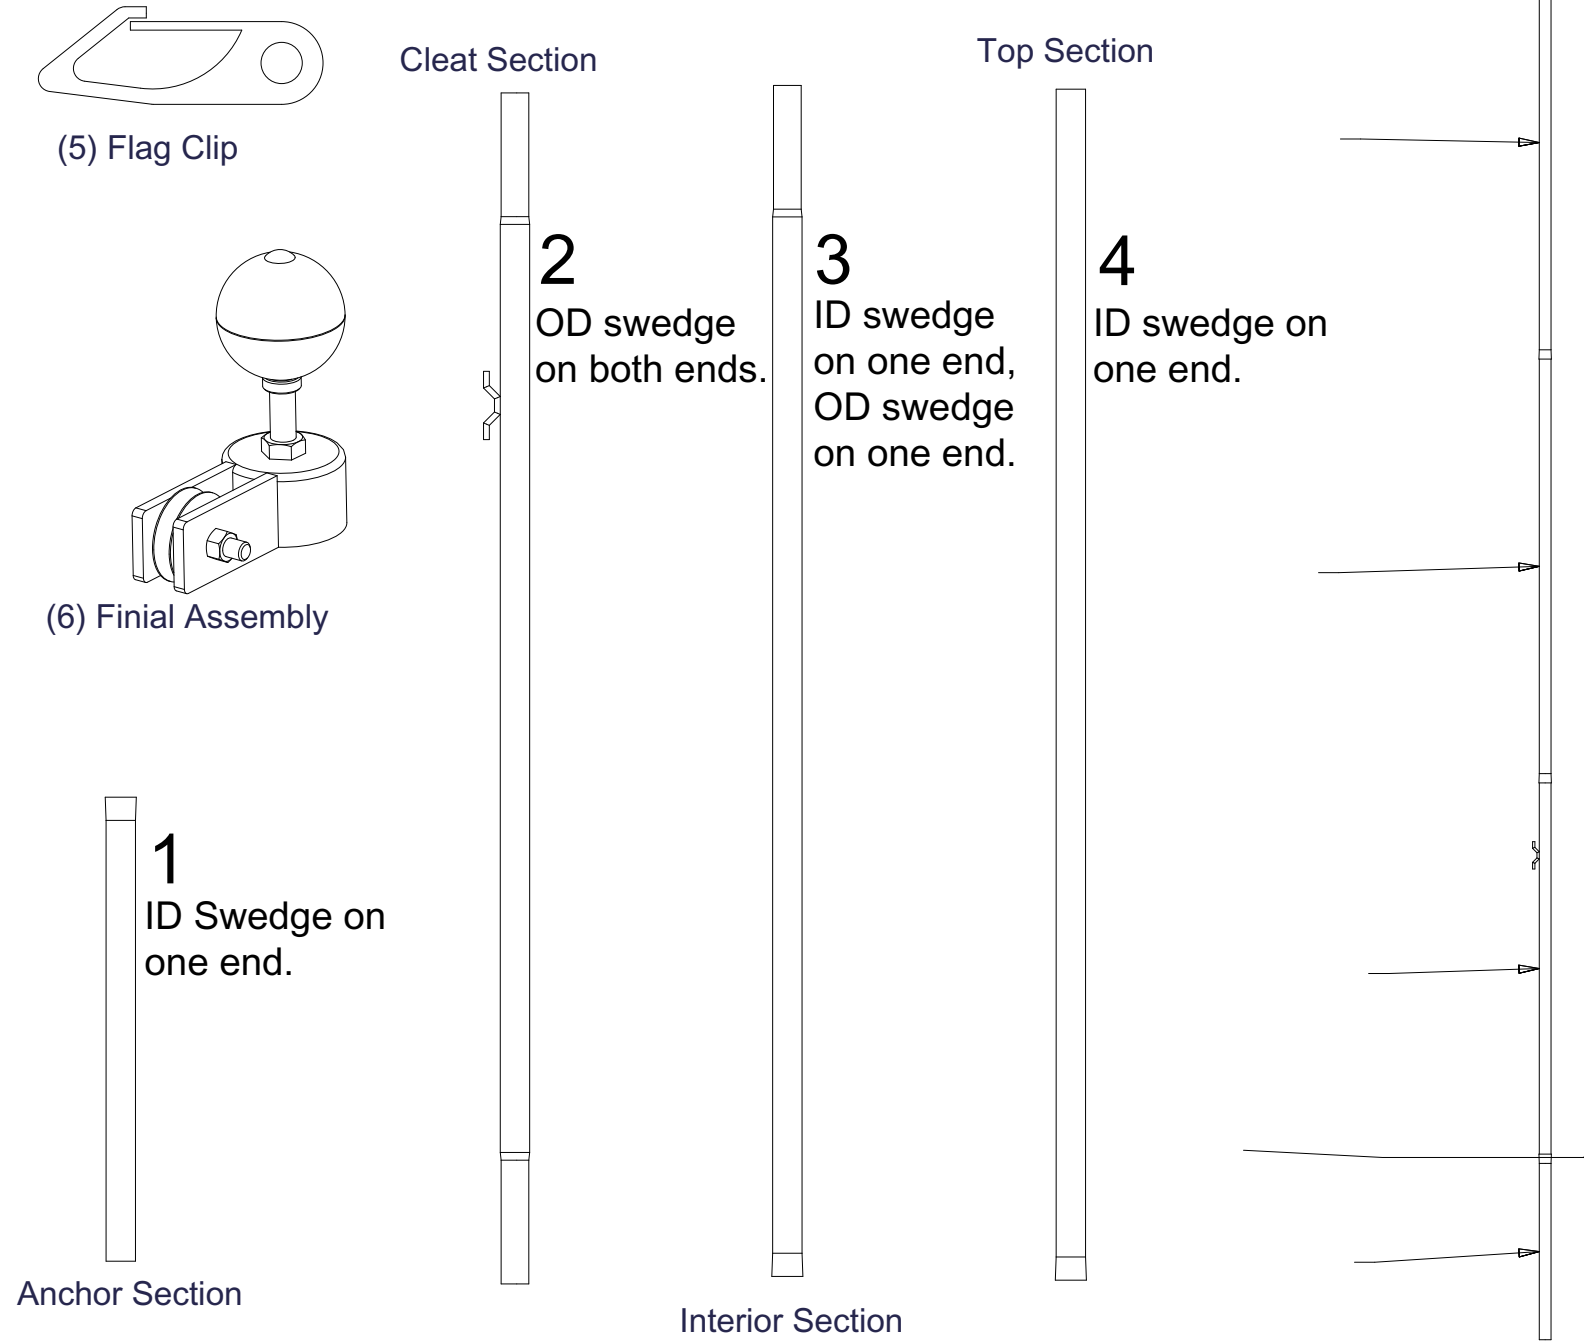

1. Place anchor section approximately 30" into the ground, making the top of the anchor section flush with ground level. Make sure that this section is plum by inserting the cleat section (#2 on parts list) and checking with a 3 foot level all the way around. Be sure to check multiple times while packing the dirt or concrete around the anchor section. After this step is complete, remove the cleat section from the anchor section for the main pole assembly.

2. Assemble all remaining sections according to figure A.1.

**IMPORTANT:** When assembling ball to pole cap, DO NOT grip ball to thread bolt end into cap. Use pliers to grip bolt shank and thread into cap. See Figure B.

**IMPORTANT:** When assembling Finial Assembly to flag pole, be careful NOT to over tighten the set screw. Apply just enough torque to snug-fit the Finial Assembly to the flag pole. See Figure C.

3. Stand assembled flag pole upright and insert into anchor section. If anchor section is set in concrete, allow the concrete to dry before inserting the assembled flag pole into the anchor section.
